Disclaimer

Vera or Vera Network is an open financial platform for non-fungible token (NFT) assets. The current and future versions of Vera Network is made up of free, public, open-source or source-available software including a set of smart contracts that are deployed on various blockchains. Your use of Vera Network involves various risks, including, but not limited to, losses while digital assets are being supplied to Vera Network and losses due to the fluctuation of prices of tokens in a trading pair or liquidity pool. Before using the Vera Network, you should review the relevant documentation to make sure you understand how Vera Network works. Additionally, just as you can access email protocols such as SMTP through multiple email clients, you can access Vera Network through dozens of web or mobile interfaces. You are responsible for doing your own diligence on those interfaces to understand the fees and risks they present.

AS DESCRIBED IN THE VERA NETWORK LICENSES, VERA NETWORK IS PROVIDED "AS IS", AT YOUR OWN RISK, AND WITHOUT WARRANTIES OF ANY KIND. Although the team at Vera Network d/b/a/ "Vera Labs" developed much of the initial code for Vera Network, it does not provide, own, or control Vera Network, which is run by smart contracts deployed on the blockchain. Upgrades and modifications to the protocol are managed in a community-driven way by holders of the VERA governance token. No developer or entity involved in creating the Vera Network protocol will be liable for any claims or damages whatsoever associated with your use, inability to use, or your interaction with other users of, the Vera Network protocol, including any direct, indirect, incidental, special, exemplary, punitive or consequential damages, or loss of profits, cryptocurrencies, tokens, or anything else of value.
